FINAL AGREEMENT

I have installed energy efficient equipment listed in Duquesne Light Company's (DLC) Large Industrial Rebate Catalog, for which I am requesting a rebate, at the address listed above, which is in the DLC service territory. The equipment was purchased or contracted and installed after **June 1, 2026**. This Rebate Application Form **must be** submitted within **180 Days** from final project completion date. I believe it meets all the requirements listed on the Duquesne Light Business Solutions website in the Large Industrial Rebate Catalog and the equipment it is replacing also meets DLC's requirements.

I have attached the following:

- Itemized invoices
- Manufacturer's specification of the new equipment
- Manufacturer's specifications or description/nameplate data, photo, etc of the equipment taken out of service to install the new equipment

This project is subject to evaluation, measurement and verification (EM&V) by the PA PUC Act 129 Statewide Evaluator (SWE) and/or DLC's independent evaluator, Guidehouse Consulting that reports its findings to the SWE, collectively referred to herein as Verification Personnel.

If the Project is selected for EM&V, as a condition of accepting the incentive, Customer agrees to provide the following:

- Access by Verification Personnel to Customer premises to inspect and if necessary measure power requirements, post-installation of the Project described above.
- Available equipment performance data the Customer may have already been collecting, such as building management system trend data. Providing this data may serve to minimize Customer's inconvenience of required equipment metering.
- Access by Verification Personnel to install meters or loggers on Project equipment or electric distribution panels and to then come back to collect those meters or loggers.
- Access to facility staff familiar with the Project that can direct Verification Personnel to Project installation location.
- I understand that DLC does not endorse any specific manufacturers, dealers or contractors and provides no warranty for this energy efficient equipment.
- Project measures must save kWh in order to be qualified for an incentive.

Duquesne Light owns the forward capacity rights and the ability to bid this capacity into the PJM forward capacity market for any energy-efficiency project, measure installed, or product purchased, which includes an upstream/downstream/midstream discount, direct discount, rebate or incentive paid, or free measures installed or provided by Duquesne Light, its representative conservation service provider, partners, trade allies, or distributors. Customer can request that Duquesne Light return ownership of the forward capacity rights. Duquesne Light's decision to return the forward capacity rights is in its sole discretion and is under no obligation to return ownership of forward capacity rights upon Customer request.
